Creating Communities that Nourish Children.

Led by Hunger Free New Jersey, the New Jersey Food for Thought Campaign is driven by a statewide steering committee that includes the New Jersey Departments of Agriculture, Education and Health, anti-hunger and health groups and New Jersey's major education associations. The campaign's national partners are the Food Research & Action Center and the American Dairy Association Northeast.

The campaign's goal is to end childhood hunger by expanding school and community participation in three federal key child nutrition programs: school breakfast, summer meals and afterschool meals. For more information, visit njfoodforthought.org.

This report was produced by Hunger Free New Jersey with the generous support and invaluable technical assistance of the Food Research & Action Center.

Acknowledgements

Special thanks to the New Jersey Department Agriculture for providing the data used in this report and for its leadership in ensuring New Jersey children have healthy food to eat.

A very special thanks to Alison Maurice, child nutrition policy analyst, Food Research & Action Center, for lending her extensive data expertise to this report.

High Poverty New Jersey Schools Missing Out on School Breakfast

New state law promises to deliver breakfast to more students

By Nancy Parello

New Jersey's most impoverished schools are failing to reach nearly half of low-income students with federally-funded school breakfast, mainly because many continue to provide breakfast before school when most children have not yet arrived.

A new state law requires schools with at least 70 percent of students eligible for free or reduced-priced meals to serve breakfast during the school day. Known as breakfast after the bell, this approach significantly boosts student participation in the federal School Breakfast Program, which provides federal dollars to feed breakfast to low-income students in New Jersey and across the nation. The new state law takes effect in September 2019.

The School Breakfast Program and others like it recognize the strong link between nutrition and learning. Yet many New Jersey schools are failing to take full advantage of this critical nutrition service.

According to an analysis of state data conducted by Hunger Free New Jersey and the Food Research & Action Center, 648 New Jersey public schools fall under the new school breakfast legislative requirement.

These schools account for more than half of all students who are qualified for free or reduced-priced school meals. Many of these children live in families that struggle to put food on the table.

“If these high-poverty schools achieved 80 percent student participation, they would collectively receive an additional \$30.4 million in federal funds.”

Yet, in October 2018, just over half of eligible, low-income students in these schools received a school breakfast on an average day. More than 137,000 children eligible for free or low-cost meals did not receive breakfast.

If these high-poverty schools achieved 80 percent student participation, they would collectively receive an additional \$30.4 million in federal funds, based on FRAC's analysis.¹ These funds could be used to combat childhood hunger, removing a major obstacle to learning, according to the analysis.

The School Breakfast Program and others like it recognize the strong link between nutrition and learning.

The issue is not enrollment. These students are already qualified to receive free or low-cost school meals.

Instead, the issue is when breakfast is served. By serving breakfast before school, many schools continue to make it difficult for students to access this all-important morning meal. Bus and family schedules and the stigma of coming to school early to eat keep many children away from the before-school breakfast table.

When breakfast is served during the first few minutes of the school and offered to all students, student participation skyrockets. Schools with high breakfast participation — 70 percent or above — have almost certainly embraced breakfast after the bell since it is extremely

difficult to reach that high participation rate with before-school programs.

In October 2018, 208 schools — or about one-third of these 648 high-poverty schools — were feeding at least 70 percent of eligible students. These schools should be commended for taking the necessary steps to make the meal readily available to all children and teens who need it.

Unfortunately, many schools continue to resist making the logistical changes needed to implement effective breakfast programs. In fact, 42 percent of these high-poverty schools — or 272 schools — fed less than half of their low-income students in October 2018.

To help measure progress on school breakfast participation, this report includes statewide participation data and local statistics for low-performing schools. Hunger Free New Jersey has also published local data for all schools impacted by the legislation and will publish data for all school districts with at least 20 percent of students eligible for free or reduced-price school meals. Those statistics can be found at hungerfreenj.org.

By examining local data and using this information to make smart changes to school breakfast programs, schools can ensure all students begin their day with the nutrition they need to concentrate and learn, while claiming federal dollars currently left on the table. Not only is this the right thing to do, it leverages our state’s considerable investment in public education by removing a major barrier to learning: hunger.

Summary of Schools with 70% or More Low-Income Students		
Overview	Number	Percent
Number of schools	648	33% of all schools serving breakfast
Enrollment	327,145	24% of total public school enrollment
Students eligible for free/reduced price school meals	291,107	89
Students eligible for free/reduced price school meals as a % of statewide total	N/A	54
Low-income students receiving free/reduced price school breakfast	153,498	53
Low-income students NOT receiving breakfast	137,609	47
Participation Rate Breakdown	Number	Percent of All Schools with 70% or more low-income students
Schools feeding 70% or more low-income students	208	32
Schools feeding 50-69% low-income students	168	26
Schools feeding 20-49 percent low-income students	219	34
Schools feeding 0-19 percent low-income students	53	8
Total	648	100

Feeding Kids is Part of the Fabric at Greater Brunswick Charter School

“Bus and family schedules and other factors prevented early arrival for most students. That’s why breakfast served during the regular school day really boosts student participation, while eliminating the stigma associated with coming to school early to eat breakfast.”

—Dean of Students Carmen Rine

“The first day of a book drive, a school earned \$10. Each day after that, the amount tripled from the day before. How much did the school earn from a 4-day book drive?”

That is the question 4th graders grappled with as they munched on bagels and bananas one morning at the Greater Brunswick Charter School, where classroom breakfast is paired seamlessly with learning.

“Breakfast is part of the fabric of our school,” says Vanessa Jones, education director. “There’s a system. It works. It’s just part of our routine.”

The school was among the first charters to jump on the breakfast after the bell bandwagon more than seven years ago. School officials knew that hunger was a barrier to learning for their students, with nearly 90 percent coming from low-income homes that struggle to put food on the table. Teachers often spent their own money on snacks for hungry students or students went to the school nurse for crackers or other tidbits.

No more.

“The need to have a snack has faded away,” Jones says.

Everyone pitches in to make breakfast work. Teachers devise lessons that incorporate easily into breakfast time. Parents encourage their children to eat at school. Kitchen staff pack the meals in refrigerated containers the night before. The head custodian delivers the meals to the classrooms each morning.

As a result, the school’s 88 percent participation rate is more than double the statewide average of just 42 percent.

■ Greater Brunswick Charter Schools get some school work done while they eat breakfast.

Photo courtesy of Greater Brunswick Charter School

Before breakfast after the bell was implemented, many students simply could not get to school early enough to eat breakfast before the first bell rang, says Dean of Students Carmen Rine, who oversees the district’s food service.

“Bus and family schedules and other factors prevented early arrival for most students,” she says. “That’s why breakfast served during the regular school day really boosts student participation, while eliminating the stigma associated with coming to school early to eat breakfast.”

“Mornings are hectic,” adds Susan Jackson, chair of the school board and mother of a Greater Brunswick Charter 4th grader. “Knowing that you don’t have to fight that battle is one less thing to worry about. Plus, the kids love it. They look forward to certain days when their favorite food is on the menu. It also helps with the stigma. Everybody eats.”

When classroom breakfast was first introduced, 4th grade teacher Zoe Coleman was concerned it would interrupt instructional time. Instead, it has enhanced it.

“We have a problem for students to solve during breakfast time, usually math but sometimes science,” she says. “They enjoy their breakfast and they’re more alert for the rest of the morning. Prior to that, we had hungry kids we had to send to the nurse for a snack. Now we don’t have that.”

continued on the following page...

continued from previous page...

And the kids love it.

"I like when we come in the morning and have breakfast," says 4th grader Janessa. "A lot of mornings I don't have time to eat before school. When we're doing our warm-up we can eat at the same time."

"I like that you can work and eat and don't have to rush," adds classmate Nicole.

First grade teacher Trish Mollema used to stock up on snacks because so many of her students were hungry. She says she was "thrilled" when the school began serving breakfast after the bell.

"We saw a need," she says. "This eliminates one pressure on our families and students."

Classroom breakfast also helps students develop life skills, says Lilia Fabila-Guilbot, family coordinator.

"In some classrooms, the students help with putting out the napkins, serving the meals or taking out the trash," she says. "Those are good lessons for life."

Most importantly, school staff rest assured knowing students begin their day with a healthy meal.

"Breakfast gives our students the foundation they need to have a successful day at school," Jones says. "That obstacle is gone."

Statewide Snapshot

New Jersey schools continued a downward slide on school breakfast participation, with the number of low-income students receiving the morning meal declining for a second straight year.

Five percent fewer low-income students received breakfast in October 2018 compared to April 2017. That translates to about 11,000 fewer students starting their school day with a healthy meal.

Statewide, just 42 percent of low-income children received breakfast in October 2018, down from 44 percent the year before. That means more than 313,000 students were not receiving breakfast. As a result, New Jersey schools are failing to claim \$73.9 million in federal funds to feed hungry students, according to FRAC's analysis.¹ This represents the difference between current claims and the amount they would receive if all districts served at least 80 percent of low-income students.

Prior to 2017, New Jersey was making great strides in serving breakfast to more students. In 2010, the year before the launch of the New Jersey Food for Thought Campaign, the state ranked nearly last in the nation for low school breakfast participation. By 2016, New Jersey had climbed to 19th place nationwide, according to the Food Research & Action Center. That ranking slipped to 21st in 2018.

Totals include all public schools, including vo-tech, special services districts and charter schools.

New state law promises to boost breakfast

Recognizing the strong link between nutrition and learning, the state enacted a law in May 2018 that requires schools with at least 70 percent of students eligible for free or reduced-price meals to serve breakfast after the bell.

The law states:

"The Legislature finds and declares that numerous studies document that childhood hunger impedes learning and can cause lifelong health problems; and that, in New Jersey, tens of thousands of children suffer from hunger each year, with nearly 540,000 students living in families eligible to receive free or low-cost school meals...

"The Legislature therefore determines it to be the public policy of the State to help remove a major barrier to learning by providing children the nutrition they need to succeed in school, and determines that it is the understanding and the intention of the Legislature to make breakfast part of the school day, and that "breakfast after the bell" is the most effective way to ensure that all students have the morning nutrition they need to concentrate, learn, and succeed in school."

To qualify for free breakfast, a family of four in the **2018-19** school year could earn no more than **\$32,630** per year, and no more than **\$46,435** for a reduced-price meal, according to federal guidelines.

What is Breakfast after the Bell?

The goal of making breakfast part of the school day, just like lunch, is to eliminate stigma and make the meal readily available to all students — not just those who can come to school early or who arrive late.

Since most students arrive at school just moments before the first bell, breakfast after the bell means offering the meal to all students during the regular part of the school day, usually the first 10 to 15 minutes. Under the legislation, methods that reach a small number of students are not considered breakfast after the bell. For example, a single cart for students who arrive late fails to reach all students and does not make breakfast part of the school day.

While each school should choose a method of breakfast after the bell service that works best for its students and building, three common forms of breakfast after the bell have been proven do-able and effective in schools across New Jersey and the country.

Effective Breakfast Programs

- **Breakfast in the Classroom** Classroom breakfast dramatically increases student participation. Typically, food services staff pack meals into insulated containers for each classroom and deliver the meals to the classrooms before the first bell rings. Some schools appoint students who help deliver breakfast to the classrooms.

When students arrive in the classroom, they grab their meal and sit down to eat. When breakfast is over, students dispose of their trash in garbage cans for custodial staff to collect.

Often, teachers incorporate lessons into classroom breakfast time or they use that time to conduct house-keeping chores, such as attendance and announcements. In some classes, students are involved in serving and cleaning up the meal.

- **Grab-and-Go Breakfast** Breakfast carts are stationed at the entrance of the school or in other high traffic areas. Upon entering the building, children “grab” a nutritious breakfast and “go” to their first period class. This model is often used in middle and high schools.

The Benefits of Breakfast After the Bell

When children eat breakfast, research shows the following results:

- Better academic performance
- Less disruptive student behavior
- Fewer trips to the school nurse
- Increased attendance
- Reduced tardiness
- Reduced childhood obesity

- **Second Chance Breakfast** Often, teenagers are not hungry when they arrive at school. Serving breakfast after first period, commonly known as “Second Chance Breakfast,” allows students to eat when they are hungry. Students are offered meals, often grab-and-go style, either between classes or during a “nutrition break” that occurs later in the morning.

School Breakfast Underachievers

Resistance from some school leaders and staff remains a stubborn barrier to making the switch to breakfast after the bell. This is unfortunate, as districts across New Jersey have demonstrated that breakfast after the bell is do-able and benefits students, parents and the entire school community. Most districts that successfully serve breakfast enjoy strong leadership from superintendents who recognize the critical link between good nutrition and academic success.

The list on page 10 shows 53 of New Jersey’s most impoverished schools that are reaching fewer than 20 percent of their eligible, low-income students with breakfast. If these schools improve participation to 80 percent, they would collectively receive an additional \$7.3 million in federal reimbursements.

In Lakewood, Nutrition and Learning Go Hand in Hand

Lakewood school officials know nutrition and learning go hand-in-hand. That's why the district serves up breakfast during the school day, just like lunch, in all of its seven elementary schools. By serving breakfast after the bell, most of these schools are feeding at least 90 percent of their students — far surpassing statewide averages.

And that makes a big difference for student learning.

"It is extremely important to provide breakfast to all students of the Lakewood School District, as it has positive effects on their behavior and academic performance," said Superintendent Laura A. Winters. "When children start their day with a healthy breakfast on a consistent basis, their concentration and alertness improve. Our students really look forward to the healthy breakfast that Sodexo serves each morning."

Piner Elementary Principal Deborah Meabe agrees, noting that nearly all of Lakewood's public school students come from low-income homes where parents struggle to make ends meet.

"When students have not eaten, they are not as alert and their ability to do the work is not there," she noted. "Breakfast gives them the nutrition they need to concentrate and learn. And our parents really appreciate it. It takes the pressure off in the morning, knowing their children can come to school and eat."

Lakewood kindergarten teacher Marianna Fiani sees the need every day.

"The kids go right for the breakfast as soon as they walk in the classroom," she said. "They feel good knowing there is something here for them to eat in the morning."

Fiani added that breakfast quickly becomes part of the morning routine, with most teachers incorporating lessons or other activities into breakfast time.

"It takes maybe a week for the kids to get used to taking their breakfast and sitting down to eat," she explained.

"It takes maybe a week for the kids to get used to taking their breakfast and sitting down to eat. Then it's really no big deal. It works out really well."

—Kindergarten teacher Marianna Fiani

■ A Lakewood kindergartener enjoys a healthy breakfast to start her day.

"Then it's really no big deal. It works out really well."

The district is ramping up breakfast service in its middle and high schools, adding grab-n-go carts in high-traffic areas and allowing students to eat in the classroom during the first 20 minutes of the school day. These changes are driving up participation, according to Cory Goldfarb, general manager, On-site Service Solutions, Sodexo Schools Division, which manages Lakewood's food service.

"They used to have 11 minutes for breakfast but now the district is allowing more time," Goldfarb said. "That has really increased participation."

In addition to having one of the most successful school breakfast programs in the state, Lakewood also serves up summer meals, fruit and veggie snacks during the school day and afterschool snacks, with plans to start serving dinners. A weekend backpack program is also part of the nutritional support the school district provides to its students. Lakewood also participates in Community Eligibility — a federal option that allows districts to reduce paperwork, receive higher federal reimbursements for meals served and feed all children at no charge.

All this adds up to a win-win for school officials, parents and students. Not only is Lakewood effectively reducing childhood hunger and boosting learning, it is also reaping a healthy return in federal dollars — funds that are used to improve meal services for all students, Goldfarb said.

"With that money we are able to add staff, elevate our food purchases and provide nutrition education in class," he explained. "We're able to use a lot of those funds to invest back into our nutrition programs. That's good for the district. It's good for the kids. And it's good for the families."

Breakfast Boosts — Help is available!

New Jersey school districts may qualify for grants and other technical assistance through various organizations to more effectively serve school breakfast.

- **The New Jersey Food for Thought Campaign** has compiled a host of resources and links to grant opportunities and other resources at njfoodforthought.org.
- **The New Jersey Department of Agriculture** can provide guidance on planning and implementation. Contact Arleen Ramos-Szatmary at (609) 984-0692 or arleen.ramos-szatmary@ag.state.nj.us.
- **The American Dairy Association Northeast** provides technical assistance and grants to school districts. Visit dairyspot.com.
- **The Food Research & Action Center** provides implementation resources and other assistance. Visit frac.org.

Hunger Free New Jersey assists local communities in implementing successful school breakfast and other child nutrition programs. Contact Lisa Pitz, Outreach Director, at lpitz@cfanj.org.

■ End Notes

- FRAC calculated the number of additional children who would be served if each school reached 80 percent of students eligible for free or reduced-price school meals and applied the severe need reimbursement rate, as all of these schools would qualify for that higher rate.
- FRAC calculated the number of additional children who would be served if each school district reached 80 percent of students eligible for free or reduced-price school meals. The calculation assumes each district's mix of free and reduced-price students would apply to any new participants, and conservatively assumes that no additional student's meal is reimbursed at the somewhat higher rate that severe need schools receive for breakfast. Severe need schools are those where more than 40 percent of lunches served in the second preceding school year were free or reduced-price.
